

# **COMP4336/9336**

## **Mobile Data networking**

# **Recap**

# **We have covered 6 major topics**

1. Wireless fundamentals (Weeks 1-2)
2. WiFi (Weeks 3-5)
3. Bluetooth (Week 7)
4. Cellular Networks (Week 8)
5. Mobile IP (Week 9)
6. RF Power Transfer and Sensing (Week 10)

**All these topics are relevant for the final exam**

# **We tried to give you on-going feedback**

- ☐ Feedback from weekly quizzes and workouts
- ☐ Feedback in labs for experiments
- ☐ Feedback for your project
- ☐ Feedback through Moodle forums
- ☐ Annotating lecture slides during lecture

More feedback available between now and the final exam;  
e.g., Zoom consultations

# How to prepare for the final exam?

- ❑ Final exam format including mock tests are now available; make yourself familiar with the procedure
- ❑ Try to deepen your **understanding of the fundamental concepts** covered in the lecture slides; ask questions in the forums if you have any doubts and confusions
- ❑ Revise weekly quiz workouts (a total of 90 questions) and reflect on the topics; try to **visualize further potential questions** on similar topics from **different angles** or **parameter values**
- ❑ Try to read about these topics from sources beyond the lecture notes, e.g., blog posts, industry white paper, standards documents, other published articles, etc. (some pointers are already given in some of the lectures) to develop further confidence

# Good Luck!

- ❑ Hopefully, you have learned some new things that you did not know when you started this course
- ❑ Stay safe and attend the final exam calmly
- ❑ Wish you all the best with your exam and future endeavours
- ❑ Hope you enjoyed the course

**Please do not forget to give us your feedback, especially the written ones, via MyExperience survey; Your feedback is VERY important to us.**
